The Veterans Technology Services (VETS) 2 Government-wide Acquisition Contract (GWAC) is a Multiple Award, Indefinite-Delivery, Indefinite-Quantity (IDIQ) contract to provide customized Information Technology (IT) services and IT services-based solutions.

The principal nature of any resulting task order procurement must be for IT services; however ancillary support may be included when it is integral to and necessary for the IT services-based effort. The GSA will use an acquisition strategy similar to One Acquisition Solution for Integrated Services (OASIS) and OASIS

With a \$5 Billion program ceiling and a five-year base period with one five-year option, VETS allows for long-term planning of large-scale program requirements while strengthening opportunities for service-disabled, veteran-owned small businesses.

The maximum contract ceiling value of all contracts in this multiple award procurement is established at \$5 Billion dollars. The minimum guaranteed award amount for this IDIQ contract is \$2,500 dollars per contract for the full term of the Master Contract. The exercise of the option period does not re-establish the contract minimum.

Service Components

- Data Management
- Information and Communications Technology
- IT Operations and Maintenance
- IT Security
